

### Phonetic Codebreaking One – Numbers

In this puzzle, you have been given a list of twenty numbers between zero and a hundred. The numbers have been written out in phonetic letters, but in a code in which each phonetic letter of the numbers' true phonetic spellings has been replaced with another phonetic letter. For instance, the four phonetic letters in first code word, "pdæg", stand for four other phonetic letters which form the real phonetic spelling of a number. The code will be the same for all of the words on the list. Thus the "p" letter in "pdæg" will stand for the same letter that the "p" letter in the fifth word does, and so on. Your task is to solve the code and discover the names of the numbers on the list. Write the correct phonetic spellings of the numbers in the blanks under the Phonetic Spelling column. Then write the spellings of the numbers in English in the third column.

Code Spelling	Phonetic Spelling	English Spelling
pdæg	- - - -	_____
tɜ:æ	- - -	_____
ŋmð	- - -	_____
tbkw	- - - -	_____
pjzpkðg	- - - - - - -	_____
lɒg	- - -	_____
kldʃæ	- - - - -	_____
gɜ:g	- - -	_____
ŋækwtɜ:æ	- - - - - - -	_____
kh	- -	_____
kldgkwgɜ:g	- - - - - - - -	_____
ɑ:k	- -	_____
jfdæg	- - - - -	_____
tb	- -	_____
tjtkwpjzp	- - - - - - - -	_____
gɜ:gkðg	- - - - - - -	_____
kdg	- - -	_____
pdægkwɒg	- - - - - - - -	_____
θʌmɔz	- - - -	_____
ɑ:kwɒdæg	- - - - - - - -	_____
