

Phonetic Codebreaking One – Numbers

In this puzzle, you have been given a list of twenty numbers between zero and a hundred. The numbers have been written out in phonetic letters, but in a code in which each phonetic letter of the numbers' true phonetic spellings has been replaced with another phonetic letter. For instance, the four phonetic letters in first code word, "pdæg", stand for four other phonetic letters which form the real phonetic spelling of a number. The code will be the same for all of the words on the list. Thus the "p" letter in "pdæg" will stand for the same letter that the "p" letter in the fifth word does, and so on. Your task is to solve the code and discover the names of the numbers on the list. Write the correct phonetic spellings of the numbers in the blanks under the Phonetic Spelling column. Then write the spellings of the numbers in English in the third column.

Code Spelling	Phonetic Spelling	English Spelling
pdæg	- - - -	_____
tɜ:æ	- - -	_____

Phonetic Codebreaking Two – Colours

In this puzzle, you have been given a list of twenty colours. The names of the colours have been written out in phonetic letters, but in a code in which each phonetic letter of the colours' true phonetic spellings has been replaced with another phonetic letter. For instance, the three phonetic letters in first code word, "ŋɑʊtʃ", stand for three other phonetic letters which form the real phonetic spelling of a colour. The code will be the same for all of the words on the list. Thus the "ŋ" letter in "ŋɑʊtʃ" will stand for the same letter that the "ŋ" letter in the sixth word does, and so on. Your task is to solve the code and discover the names of the colours on the list. Write the correct phonetic spellings of the colours in the blanks under the Phonetic Spelling column. Then write the spellings of the colours in English in the third column.

Code Spelling	Phonetic Spelling	English Spelling

Phonetic Codebreaking Three – Family Members

In this puzzle, you have been given a list of nineteen family members. The names of the family members have been written out in phonetic letters, but in a code in which each phonetic letter of the family members' true phonetic spellings has been replaced with another phonetic letter. For instance, the three phonetic letters in first code word, "i:lɒ", stand for three other phonetic letters which form the real phonetic spelling of a family member. The code will be the same for all of the words on the list. Thus the "l" letter in "i:lɒ" will stand for the same letter that the "l" letter in the third word does, and so on. Your task is to solve the code and discover the names of the family members on the list. Write the correct phonetic spellings of the family members in the blanks under the Phonetic Spelling column. Then write the spellings of the family members in English in the third column.

Code Spelling	Phonetic Spelling	English Spelling

ɔ:ɔ:ɔ:pk ɜ:l ŋt	- - - - -	_____

Phonetic Codebreaking Four – Parts of a House

In this puzzle, you have been given a list of twenty areas in and outside the house. The names of the areas have been written out in phonetic letters, but in a code in which each phonetic letter of the parts' true phonetic spellings has been replaced with another phonetic letter. For instance, the five phonetic letters in second code word, "gdɜ:dw", stand for five other phonetic letters which form the real phonetic spelling of a house part. The code will be the same for all of the words on the list. Thus the "g" letter in "gdɜ:dw" will stand for the same letter that the "g" letter in the third word does, and so on. Your task is to solve the code and discover the names of the house parts on the list. Write the correct phonetic spellings of the house parts in the blanks under the Phonetic Spelling column. Then write the spellings of the house parts in English in the third column.

Code Spelling	Phonetic Spelling	English Spelling

Phonetic Codebreaking Five – Sports

In this puzzle, you have been given a list of twenty-three sports. The names of the sports have been written out in phonetic letters, but in a code in which each phonetic letter of the sports' true phonetic spellings has been replaced with another phonetic letter. For instance, the six phonetic letters in second code word, "ghɒfɜ:k", stand for six other phonetic letters which form the real phonetic spelling of a sport. The code will be the same for all of the words on the list. Thus the "g" letter in "ghɒfɜ:k" will stand for the same letter that the "g" letter in the third word does, and so on. Your task is to solve the code and discover the names of the sports on the list. Write the correct phonetic spellings of the sports in the blanks under the Phonetic Spelling column. Then write the spellings of the sports in English in the third column.

Phonetic Codebreaking Six – Illnesses and Complaints

In this puzzle, you have been given a list of twenty-one words related to feeling unwell. The twenty-one words have been written out in phonetic letters, but in a code in which each phonetic letter of the words' true phonetic spellings has been replaced with another phonetic letter. For instance, the six phonetic letters in second code word, "ghɔfɜ:k", stand for six other phonetic letters which form the real phonetic spelling of a sport. The code will be the same for all of the words on the list. Thus the "g" letter in "ghɔfɜ:k" will stand for the same letter that the "g" letter in the third word does, and so on. Your task is to solve the code and discover the names of the sports on the list. Write the correct phonetic spellings of the words in the blanks under the Phonetic Spelling column. Then write the spellings of the sports in English in the third column.
